Introduction of HTML Document

```html
<!DOCTYPE html>
<html>
    <head>
    <!--  UTF Unicode Transformation Format -->
        <meta charset="utf-8">
        <title>Learn HTML</title>
    </head>
<body>

    <h1>&copy</h1>
    <h1>&trade;</h1>
    <h1>&#8377</h1>
    <h1>Good Morning B - 153 Batch </h1>

</body>
</html>
```

Paragraph Tag, break tag,hr tag,inline css, heading tag

```html
<!doctype html>
<html>
    <head>
        <meta charset="utf-8">
        <title> Learn HTML Tag</title>
    </head>
<body>
    <!--  There are 6 heading tag available in HTML h1 to h6 -->

    <!-- heading tag and p tag are called block level element -->

    <!--
    <h1 style="border:2px solid">Welcome to CJC</h1>
    <h2>Welcome to CJC </h2>
    <h3> Welcome to CJC </h3>
    <h4>Welocme to CJC</h4>
    <h5> Welcome to CJC </h5>
    <h6>Welcome to CJC</h6> -->

    <!-- Paragraph Tag-->
```

```html
    <p style="border:3px solid green; color:red; font-size:25px">
        Good Morning !!!
    </p>

    <h2> Break Tag</h2><hr>
    <p>
        Mr. Kunal Sonu, <br>
        the Director of Complete Java Classes <br>
        has Masters degree in Computer Applications. <br> He has total
8+ years of experience in providing technical skills & consultancy in
Java/J2EE technologies.
    </p><hr>

    <!-- span, font tag are called in-line level element -->
    <p>
        <span style="color:orange;border:2px solid grey">Welcome
</span> to  <span style="color:green">India </span>
    </p>

    <p>
        <font style="color:green;">Welcome </font> to  <font
style="color:orange">India </font>
    </p><hr>

    <h2>Difference between p tag and br tag</h2>

    <p style="color:red"> Namaste !!!!</p>

    <br style="color:red">Namaste !!!</br>

    <h3>There are 3 tags in html which are called self closing tag  br
tag, hr tag and image tag</h3>

</body>
</html>
```

Image Tag

```
<!doctype html>
<html>
    <head>
        <meta charset="utf-8">
        <title>Image Tag</title>
    </head>
<body>
    <h2>Learn Image Tag</h2>
